Mar 14 2024 Like CurseForge Modrinth is another Content Distribution Network. It seems to be more popular with the Fabric community and more authors in general are moving to support both

The company in control of Modrinth have more members of the Modded Minecraft community Modrinth and Curseforge are the two main websites for getting java edition mods

There is a chrome extension which will warn you when you are about to enter most untrustworthy websites for downloading mods Nov 1 2023 I am using the modrinth app to get mods for an smp

I have imported a modpack into a new instance but when i click play after about 5 10 second it turns back to play and i can click it again Feb 3 2023 Modrinth vs Curseforge is basically the website equivalent of Fabric vs Forge Modrinth is faster cleaner more reliable and open source

Because it s run openly by members of the community it leaves more of the pie to give to mod developers probably hard to measure Ideally use Modrinth to download everything I don t know how it works on Mac but on Windows Modrinth automatically downloads and setup the modloader fabric forge neoforge quilt you selected when creating an instance Feb 28 2021 I find browsing Modrinth to be physically painful who thought white on pale grey with stark black text and no border detail was a good idea? Material Design called they want you back in 2014 and I m already exhausted from browsing Curseforge to keep up with new mods so I m curious has anyone found any particularly interesting mods hosted Recently I saw many mods moving over to Modrinth saying that there are some issues with Curseforge

What issues are these? Is Curseforge compromised? How to change the Fabric Loader version of an instance in the Modrinth App Fabric Loader is not a mod despite the Fabric Loader window referring to it as such Jan 17 2024 Just installed Modrinth app and it fails to install any modpack An error occurredError Missing correct java installation I want to play a mod pack that s only on curseforge with my friends but they only have modrinth

How do I move it from curseforge to modrinth?.
