Restart Option 1 From either the Windows 10 sign on screen or the Start menu click Power Power button icon

Now hold down the Shift key while clicking on Restart Dec 23 2024 Hi everyone I'm experiencing a bright white screen issue on my MSI Raider GE78 HX 13V OS Windows 11 Intel UHD Graphics NVIDIA GeForce RTX 4070

When I boot up the initial boot screen appears normal but the Windows login screen is completely white with faint shadows of the login box

Here's what I have tried Booting into Safe Mode The screen works fine but Safe Mode with Mar 26 2025 Try these 1. Clean Uninstallation Use MSI Clean Center Master again to remove all traces of MSI Center and its SDK

Check for leftover files in directories like C:\Program Files x86\MSI or C:\ProgramData\MSI and delete them manually. 2. Perform a clean boot on Windows 11 Open the Start menu and search for msconfig. Click on the System Configuration app to open it

Go to the Services Jan 17 2025 MSI Claw 7 or 8 AI+ Consolidated Issues Post here MSI please read and respond May 30 2024 Hello everyone well basically I want to improve my ram memory on my Thin GF63 12UCX 477SP laptop. Currently I have a slot with 8GB of ram and the other slot is free

I was thinking about buying a 16GB ram memory for the free slot however I was looking at this model CT16G4SFRA32A from the Crucial brand from the manufacturer Micron

But there are people who tell me that this is not Nov 25 2024 Hey guys I recently got myself a brand new Cyborg 15 A13V with i7 13620H RTX 4060 and 16 GB of RAM from Amazon's Black Friday deals. It came with Windows 11 pre installed and I set it up yesterday without any issues

Once everything was done I started doing my regular settings like setting the wallpaper to simple black color I don't care about fancy features wallpapers or anything. I Mar 25 2025 5080 vanguard. X870 carbon

When the computer boots up the GPU's RGB lights turn on normally but after the system has fully loaded they go off. The other RGB devices work fine and I have to reopen MSI Center for the GPU's RGB to light up automatically again

Any idea why? Oct 21 2022 If the Ene.sys driver cannot load during system startup try reinstalling the driver or updating it to the latest version. Ensure that your system files are not corrupted and check for compatibility issues. If problems persist consult technical support for further assistance
