Feb 21 2011 I know that the entities lt and gt are used for < and > but I am curious what these names stand for

Does lt stand for something like Left tag or is it just a code? Sep 12 2011  
Short answer If you re putting the text in a safe location in a document that uses a fully Unicode compatible text encoding like UTF 8 HTML only requires the same five characters to be escaped as XML the ampersand as amp the less than sign < as lt the greater than sign > as gt the double quote as and the single quote as 39

Safe locations are directly in the contents of May 5 2015 In HTML you can write the greater than sign > as gt and the less than symbol < as lt

Is this encoding defined by the HTML encoding or some standard like ISO UTF xxx BaseXXX Jan 3 2017 What is the meaning of 'lt' in '[ifltE 9]?' Asked 8 years 11 months ago Modified 5 years 7 months ago Viewed 36k times Jul 2 2013 How would I write the entity name in HTML and not have it do its function? Example I m doing a tutorial and want to tell someone how to use the non breaking space in their code amp nbsp So ho Oct 25 2013 Difference between lt and < Asked 12 years 2 months ago Modified 12 years 2 months ago Viewed 3k times Jul 30 2020 Swappingltwith gt reverses the order if the implementation stays the same that s a general property of inequalities and not specific to python

Explaining point 1 in more detail string comparison for two strings of digits of equal length checks one letter at a time if the ascii index of the digit in question is greater

Ascii was designed so that this corresponds exactly to whether two Sep 8 2012 Understanding ltand gt Asked 13 years 3 months ago Modified 7 years 10 months ago Viewed 40k times Mar 8 2010 Something like \* lt \* will probably do. Have the parser produce the file save it

Read in the file as plaintext and replace your instances of \* lt \* with the regular < character. Re write the file clobbering the version that was written by the XML parser Jul 23 2014 i have to write a few lines to a xml file which should contain lt and > symbols as part of value of a tag

i am setting them in a string that has some text along with lt and > symbols and af.
