Feb 23 2024 New Op.gg metrics Excellent average team disparity struggled
resilience and Rollercoaster are extremely useful for analyzing patterns and
choosing games to review improve! Feb 16 2023 The time I tried using Porofessor
it would show me different champion winrates and counters than U.GG

I found using U.GG more reliable when it came to these things also using the app
was at times very annoying. U.GG is simply very easy to use although I hope they
make the app the same as the browser version that is able to show multiple
buildpaths rune paths etc

and their winrates for Oct 27 2021 I like opgg because it is light weight and
works for what I want

I basically just want a fast rune and summoner pick then I can adjust as I want
Blitz was too sluggish in changing runes and Summoner s I have a good computer
too I haven t used porofessor because I avoid overwolf May 18 2022 League of
graphs is pretty good it s the one I use the most because it has custom games in
the match history convenient when you re scouting a tournament opponent

And overall it has the features of opgg with additional ones like mastery points
on played champions Feb 8 2022 15 votes 22 comments. trueLolalytics is what you
should use for builds imo. It breaks it down by highest win rate and highest
pick rate for builds

Just keep in mind if a build has a high win rate but a very low pick rate the
number might not be super reliable but overall the site is the best imo Op.gg
for match histories and Lolalytics for win rates on champs match ups and builds
Aug 11 2023 Lately I have noticed alot of streamers and others using deeplol.gg
instead of op.gg what made so many people switch? I always saw people use op.gg
before

Even on trackdiff there used to be a link to each streamer op.gg and they
changed it to their deeplol.gg profile instead and erased the op.gg link what
gives? Nov 21 2021 Ive been quite curious now as to which one is more accurate
in terms of win rates

Ive been using OP.GG for a while due to its easy access having it be an app on
the App Store. But I feel like U.GG is better because its used by every big name
for winrates

So is it worth it to sacrifice convenience for a reliability? Thank you for you
input and have a good day Jan 7 2023 Various differences in categorization like
that. Also update frequency and in opgg s case regional filtering

Theres also different winrate offsets the sites use to counteract average
