Macbeth can't be killed by a man born from a woman. Macbeth will be defeated when Birnam Wood arrives at Dunsinane Castle. Macbeth kills Macduff's family. Macduff learns of this and invades Scotland with the aid of Duncan's sons and English forces

Lady Macbeth kills herself because of the guilt she feels. The apples will accumulate on the man's side

Eventually there will be an equilibrium at which there are ten times as many apples on the man's side and the boy is returning the apples as fast as the man can throw them. We know that the man travels 40 km in 1 h so we can set up what is called a conversion factor of Man vs. Man vs. Self Man vs.

Society Man vs. Nature Man vs. Man When a character is having problems or conflict with another character External Example The little boy yelled at his friend for hitting him in the arm. The conflict caused is by the boy's friend effecting the little boy Man vs.

Self When a character is having problems with themselves usually psychological Internal Acceleration due to gravity on Europa is  $1.3156 \text{ m sec}^{-2}$  A man weighing 100 kg

will weigh 13.416 kg Newton's law of gravitation states that force of gravity  $F$  between two objects of mass  $m_1$  and  $m_2$  at a distance of  $r$  from each other is given by  $F = G m_1 m_2 r^{-2}$  for a man on Earth's surface if his mass is  $m$  this force will be  $F = G m M_E R_E^{-2}$  where  $M_E$  is mass of Earth and  $R_E$  is Earth's radius. The moon landing was the culmination of a challenge made by President John F

Kennedy at a speech made at Rice University on September 12, 1962. Kennedy challenged the United States to put a man on the moon before the end of the decade. See a solution process below. First we need to determine how much was left before the man spent 20%

We can rewrite this part of the problem as 10200 is 80% of what? We are using 80% because he spent 20% so the man has  $100\% - 20\% = 80\%$  left. Percent or % means out of 100 or per 100. Therefore 80% can be written as 80/100

When dealing with percents the word of means times or to. There is no concrete answer to this because it depends on your outlook on it. Below is a comparison of the two generals. After reading it you can ultimately decide who you think was the better general. General 1 Robert E

Lee Strength Second in his West Point class An engineering officer A career military officer Great tactician Well known officer Good at offense and defense Was loyal Well the atom has an electronic structure of  $1s^2 2s^2$  And it lies
