Sep 20 2016 What do you mean they give the same result? `rm -r` `emptydir` removes that directory `rm -f` `emptydir` does not

These are two completely different command line options each doing whatever its documentation says is doing Oct 12 2011 How can I remove a file without asking the user if he agrees to delete the file? I am writing shell script and use `rm` function but it asks `quot remove regular file? quot` and I really don't need The `exec rm` is not recommendable on many systems for reasons I gave lack of support or a desire to restrict process count

widely recommended does not mean ideal for all circumstances and failing to address that assumption seems irresponsible Dec 20 2023 `rm` cannot remove 'dir name Directory not empty Ask Question Asked 2 years ago Modified 2 years ago As we all know on a *nix system `rm -rf some_directory` removes `some_directory` and all files beneath it recursively without asking for confirmation

What is the equivalent of this command in Nov 7 2025 I know that that it takes a long time to remove a big file because big files have larger number of blocks to be unlinked. But when I interrupt an ongoing `rm` of a large file the file is still gone Sep 4 2017 The `rm` command removes files

The `r` option will perform a recursive removal and the `f` option will remove files without prompting you to confirm that you wish to have them removed even if you would otherwise be prompted as to whether you wish to remove them due to the files permissions. E.g

if you type `rm -rf somedirectory` the command will remove all files and subdirectories beneath the Jun 12 2015 So `rm` will warn you if you try to delete a file you don't have write permissions on

This is allowed if you have write permissions on the directory but is a little weird which is why `rm` normally warns you about it I try to remove a folder with `rm -rf foldername` but it says `rm cannot remove folder is a directory`. What's wrong? Jan 14 2023 The better solution is `rm -rf *`

Shell globs wildcards are expanded before the command is executed and there is no significant restriction on file names which means that certain classes of filename can affect the command execution itself Some common synonyms of hate are `abhor` `abominate` `detest` and `loathe`

While all these words mean to feel strong aversion or intense dislike for hate implies an emotional aversion often coupled with enmity or malice Find 131 different ways to say HATE along with antonyms related words and example sentences at Thesaurus These are words and phrases related to hate
