Original URL: <https://tools.orientwatchusa.com/mermaid-porn.pdf>

MermaidDiagramming and charting tool JavaScript based diagramming and charting tool that renders Markdown inspired text definitions to create and modify diagrams dynamically C4 Diagram This is an experimental diagram for now. The syntax and properties can change in future releases

Proper documentation will be provided when the syntax is stable.Mermaid s C4 diagram syntax is compatible with plantUML

See example below C4 Diagram Config Schema txt <https://mermaid.js.org/schemas/config.schema.json> \$defs C4DiagramConfig The treemap diagram implementation inMermaidis designed to be simple to use while providing powerful visualization capabilities

As this is a newer diagram type feedback and feature requests are welcome through theMermaidGitHub repository Mermaidallows you to set unique colors for up to 12 sections where cScale0 variable will drive the value of the first section or time period cScale1 will drive the value of the second section and so on

In case you have more than 12 sections the color scheme will start to repeat Class diagrams can also be used for data modeling

The classes in a class diagram represent both the main elements interactions in the application and the classes to be programmed.Mermaidcan render class diagrams Mermaidmindmaps can show nodes using different shapes

When specifying a shape for a node the syntax is similar to flowchart nodes with an id followed by the shape definition and with the text within the shape delimiters Jan 5 2014 As shown here A Gantt chart is useful for tracking the amount of time it would take before a project is finished but it can also be used to graphically represent non working days with a few tweaks.Mermaidcan render Gantt diagrams as SVG PNG or a MarkDown link that can be pasted into docs Properties algorithm? optionalalgorithm string Defined in packages mermaid src rendering util render.ts 11 Edit this page on GitHub Following these directions mermaidstarts at page load and when the page has loaded it will locate the graph definitions inside the pre tags with class= mermaid and return diagrams in SVG form following given definitions.
