To create a Harvard reference list for a McKinsey report on Public Private Partnerships PPPs you would follow the general format for referencing a report

Here is an example of how to reference a McKinsey report on PPPs Jun 3 2022. This report contains confidential and proprietary information of McKinsey Company and is intended solely for your internal use.

Do not reproduce, disclose or distribute the information contained herein without McKinsey Company's express prior written consent. The following selected citation examples are for documents common to business; in some cases there are different ways to interpret how to cite a specific item.

Remember that many sources won't exactly match the style templates. Rules for handling works by a single author or multiple authors that apply to all APA style references in your reference list regardless of the type of work (book, article, electronic resource, etc.)

The APA manual recommends the use of the author date citation structure for in-text citations. This structure requires that any in-text citation (i.e.

within the body of the text) be accompanied by a corresponding reference list entry. Does McKinsey accept article submissions? While the majority of our articles are written by McKinsey consultants and alumni, we do accept submissions from external thought leaders and practitioners. On page 3 of the report we can find one simple reference.

So as not to visually distract the reader, the authors use a footnote. This is appropriate for a glossy high dollar report for which McKinsey and other powerful consulting houses are well known. The free Scribbr Citation Generator is the quickest way to cite sources in these styles.

Simply enter the URL, DOI, or title and we'll generate an accurate, correctly formatted citation. Start by searching for the source you want to cite in the search box at the top of the page. MyBib will automatically locate all the required information. If any is missing, you can add it yourself.

Your citation will be generated correctly with the information provided and added to your bibliography. You need to include an in-text citation wherever you quote, summarise, or paraphrase from a source.

An in-text citation consists of the last name of the author(s), the year of publication, and a page or paragraph number if relevant. See the 'Page numbers' section for more information.
