The new keyword in JavaScript can be quite confusing when it is first encountered as people tend to think that JavaScript is not an object oriented programming language. What is it? What problems You should use new when you wish an object to remain in existence until you delete it

If you do not use new then the object will be destroyed when it goes out of scope
Dec 11 2009 A new expression is the whole phrase that begins with new

So what do you call just the new part of it? If it s wrong to call that the new operator then we should not call sizeof the sizeof operator or the address of operator when it behaves like one
