If you used the Reflect download agent to download the Reflect set up installer and ended up with v6.3.1745 re installed after running it that s because the download agent picked up your existing v6 license key from the Windows registry When I originally updated from Win7 to Win10 earliest free upgrade Windows Updater gave me a list of incompatible programs BEFORE the conversion

Although I had the installation files squirreled away I didn t trust that they would install the latest and I was going from Win32 to Win64 I chose to get fresh downloads from the software download site manufacturer or public or Windows store Replacing Windows Task Scheduler which is what Macrium uses may have made sense if the standard Task Scheduler actually failed to kick off tasks

But as you can see in my posting up above the Task scheduler actually calls on Macrium Reflect exactly when prescribed Feb 16 2017 very annoying been using macrium on this laptop for years with no problems till I uninstalled the paid version to put on another pc May 23 2023 Start Macrium and choose to create an image

Thanks to you and the others for your interest and time with my issue Post Reply Prev123Next v7.1 MIG Offsite Storage View Options Nobody said Reflect couldn t back up files in a VeraCrypt drive. The line is that it isn t supported. That s not always the same thing

I was reacting to the OP s decision to try Acronis when told by Macrium support that the VeraCrypt environment wasn t supported

As you say not supported does not imply doesn t work Macrium Support Forum Macrium Support Forum Reflect V7 Disk Imaging Incrementals runtime expands from 2 3 mins to 50 mins a week or so after each Full backup. 20% SDD read utilisation Hi I ve been using Macrium for years

Not had a problem Macrium Support Forum Macrium Support Forum Reflect V7 Rescue Media USB Flash Drive Media Creation Free Space Issue I have been experiencing this problem for awhile

for some reason I cant create a rescue media on a 1GB USB flash disk When creating rescue media in MR build 7.2 4952 on a Win10 Pro machine with the following options WinRE 4.0 Win Boot Menu add wifi support checked copy profiles for automatic wifi checked The advanced options devices and drivers dialog shows only the ethernet and other controllers no wifi cards

The ethernet card on the machine is already disabled. Once created and booting into the.
