Since the relation can be reduced to between problems is an order relation you can think of NP hard as meaning at least as hard as all NP problems

An NP complete problem is simply one of the problems in NP that isNP hard Jun 1 2019 Markush structures play an important role in cheminformatics especially in chemical patents

This paper presents a novel algorithm for automatically Apr 3 2022 The theorem is named after Stephen Cook and Leonid Levin

An important consequence of this theorem is that if there exists a deterministic polynomial time algorithm for solving Boolean satisfiability then everyNPproblem can be solved by a deterministic polynomial time algorithm Given that we expect the starting point to be classically succinct we can conjecture additionally that the state preparation problem in chemical matter is then in factNPhard loosely classically exponentially hard Apr 1 2005 Cook s Theorem [Cormen T.H
