Apr 25 2019 I m totally new to this and can t find a solution anywhere about this problem

I m trying to select faces however it will not selectthefaces that I want Apr 24 2024 I have aFaceHosted family instance if i deletetheHost parent Element the facebased family instance got <not associated> am trying to rehost to new host elementfacereference is there any api to do that in revit and i am using to createfacefamily instance by doc.Create.NewFamilyInstance Apr 29 2025 See my screenshots for reference

There is a plan view section view elevation view included. I am trying to hostface based boxes tothe faceof a balcony in a theater

This balconyfaceis withinthelinked architectural model.Thebalconyfaceis angled as you can see inthesection view and also curved as seen in plan Mar 12 2010 My splitfacewas done in a workset that wasn t visible

This allows to still showthendifferent patterns but won t allow to selectthesplit element. So either check for hidden elements in your views or set all your worksets to show intheview you want to work if you re working in a shared model Jul 11 2022 I m new to 3ds max as of today

I need to connect one side of this mesh totheother. How can I select vertices and create faces from them? Like this picture Thanks for any and all help! Dec 11 2015 Your only real option is to use face based families instead of wall hosted families

Revit will recognizethe faceof a linked object i.e. wall but doesn t allow for wall hosting through linked models. Using linked models is very common intheprofessional world. MEP folks link in Arch

Struct models allthetime Jul 14 2024 Hi all I just got started learning how T splines work and I m not sure what keywords to search resources to use for help. My model has an open front screenshot 1 and I would like to close it like what is seen inthesecound screenshot

How would I go about doing this? And if you have any tips re Jun 1 2017 Selecttheelements fromthe facebased families geometry reference planes parametric dimensions CRTL+C and CTRL+V align to viewon thenon host family

Re constrain and add whatever is missing Jul 22 2021 I get that facefor knurled grip is one of them but is thatthe sourceface orthe targetface ? A quick explanation of how ReplaceFaceworks might help understand when it succeeds and when it fails

Here is a classic case for Replace Here I want to replacethetopfaceof this
