Nov 5 2025 Theorgan is now completely unreliable its primary issues include faulty circuit boards causing constant memory capture failures and a combination action that frequently cancels registrations or refuses to engage stop tabs

Its sound quality is poor and distorted failing to adequately fill our 300 person sanctuary Jul 14 2025 Myorganteacher uses Hauptwerk but doesn't have the confidence or knowledge to get to know Hauptwerk like a computer software

They are dedicated to preserving historic American pipe organs by providing relocation renovation maintenance and tuning services Nov 2 2023 Theorganwas built in 1913. In 1938 they decided to enclose the choir dept in a swell box

To facilitate this they moved the choir from its original position directly between the Great and Swell depts turning it through 90 degrees and approx 8' over to the side of the available space. It was then that they also converted it to tubular pneumatic
