Jul 3 2023 I dont know of many options approaching pancake thickness for the Fujifilm X Series other than the aforementioned manual focus TTArtisan 25mm f2 the Fujifilm and TTArtisan 27mm f2.8s and the Fujifilm 18mm f2

I suppose the 23mm f2 on any X100 series camera would count but the entire X100 range all the way back to the original is absurdly overpriced right now. Leica M series Oct 3 2023 To answer your question though pancakelenses especially Metas are really a big deal

All the main issues that people have with fresnel lenses are not only no longer an issue but a strong point of the headset Mar 24 2022 How to Combinepancakemix and water to make uncooked pancakes Place uncooked pancakes into the oven Turn on the oven Optional watch the pancakes cook to make sure they or worse the oven do not burn Now onto the most important step

Once the pancakes are cooked DO NOT take the out of the oven and put them into your pockets Jun 30 2024 How do I fix this on thePancakebot? I tried looking through every single setting possible and I got nothing I even started googling it but nothing came up

Just wondering how do I fix this issue Jun 29 2023 From an experience stand point pancakelenses are much clearer than Fresnel lenses

They don t have the color fringing and blurring at the edges Fresnel lenses do and have a massive sweet spot Jul 27 2022 As youre searching and receiving recommendations note that the term pancake seems to be increasingly misused

For example lately the Fujifilm 18mm f2 is often referred to as apancakelens but while its relatively small and Im a BIG fan of this lens its not a truepancakelens in the sense of being a thin lens that Nov 10 2015 there certainly is but you re loading thepancake1 s old page

they ve been at pancakemizore on Patreon for quite a while now

you can bookmark the new page and check back as Colour Sliders will need an update after the patch May 28 2024 Looking at other threads asking forpancakelense the lenses suggested like the samyang 24 35 are pretty much the same size as the kit lense when retracted so no good

From my research it seems the 20mm 2.8 sony is really the only one that satisfies my needs. Ofc there is the 16mm too but that gets a bad rep. Any others that you guys can suggest? May 29 2022 Archived post
