In his discussions with Carl Jung Pauli developed an ontological theory that has been dubbed the PauliJung Conjecture and has been seen as a kind of dual aspect theory Dec 11 2025 Wolfgang Pauli was an Austrian born physicist and recipient of the 1945 Nobel Prize for Physics for his discovery in 1925 of the Pauli exclusion principle which states that in an atom no two electrons can occupy the same quantum state simultaneously In 1925 Wolfgang Pauli introduced two new numbers and formulated the Pauli principle which proposed that no two electrons in an atom could have identical sets of quantum numbers Pauli's particle was named the neutrino by Fermi in 1934 and at that time he correctly stated that it was not a constituent of the nucleus of an atom

It was later found experimentally

This period of scientific discovery by Pauli coincided with a period of increasing personal difficulties for him Wolfgang Pauli was an Austrian theoretical physicist noted for his work on spin theory and quantum theory and for the important discovery of the Pauli exclusion principle which underpins the structure of matter and the whole of chemistry Wolfgang Ernst Pauli was an Austrian theoretical physicist who pioneered the study of quantum physics and is most famous for the Pauli exclusion principle Dec 5 2015 Wolfgang Pauli was a physicist most commonly known for his Exclusion Principle and for being the proposer of the existence of the neutrino

He was awarded the Nobel Prize in Physics in 1945 for his work which allowed a deeper understanding of the atom in the physics community On the 25 July 1949 Pauli became a Swiss citizen

At the age of 58 Wolfgang Ernst Friedrich Pauli died on 15 December 1958 at the Red Cross Hospital in Zürich Switzerland Austrian born scientist Wolfgang Ernst Pauli made numerous important contributions to twentieth century theoretical physics including explaining the Zeeman effect first postulating the existence of the neutrino and developing what has come to be known as the Pauli exclusion principle Wolfgang Ernst Pauli was an Austrian theoretical physicist who made significant contributions to the field of quantum mechanics

One of his most important works was the development of the Pauli.
