Jan 23 2007 Doesn't full penetration refer to a weld the full depth of the material being welded independent of strength? My interpretation is penetration is the distance your weld extends below the plate surface Hello I'm doing a simulation in abaqus standard and I want to know if MAX.PENETRATION MAX

CONTACT FORCE ERROR and NEGATIVE EIGENVALUES is a problem or I can stay with them? If yes how can I fix them and how they affect my results

Some examples ***WARNING THE SYSTEM MATRIX HAS 23 Jan 15 2005 Where can I find in AMSE B31.1 the tolerance or acceptance criteria of excess root penetration?

Feb 27 2010 Hi guys I need to prepare pipe penetration vertical and horizontal details on structural members beams slabs walls and staircase

Any reference that you can suggest? Is there any standard details that can be follow? E.g

for beams penetration is allowed at some distance from the Oct 13 2011 The test standard requires penetration to 0.2 inches and if the CBR at 0.2 in penetration is greater than the CBR at 0.1 in penetration the test shall be rerun

I think what this means is you should not use the contractor to run your CBR tests and you should find an AMRL approved laboratory to do the work. f d pap gordo aint no madre flaca! Aug 31 2012 PENETRATION ERROR TOO LARGE COMPARED TO DISPLACEMENT INCREMENT

To solve I've tried the following lowering increments in Step to 1e-5 I tried offsetting the one surface from the other to try and stop penetration error?! changing the interaction properties definition from hard contact to linear contact with stiffness 10 000 and set Sep 12 2010 Penetration Free Attachment A first rule about any rooftop mounting is to do it without penetrating the roof membrane whenever possible

While this may seem obvious on metal roofs it is often violated. The norm for attaching things seems to be anchor to structure through the roof. Dec 13 2019 Fellow engineers I am running into a problem in the field where beam penetrations through my steel beams need to occur

Our detail shows that the depth of the penetration can be $D/3$ D = depth of steel beam and the length of the penetration is $3.4 \times D$. This rectangular penetration has fillet Feb 27 2008 I have some 16 pipes penetrating 8 block wall

do you guys know any special details to seal the wall? I am thinking just let the mason fill the void with grout. thanks Mar 19 2013 The weld is a complete joint penetration groove weld with the joint geometry changing around the circumference
