Aug 18 2024 Laser pointer forums discuss high power laserpointers. Red blue green laserpointersdiscussion and reviews. Laser pointer company reviews Jun 19 2020 FYI Under US FDA laws rules and regulations laserpointersare limited to 5mW maximum

It is illegal to import and sell from within the USA to a customer within the USA any laserpointers>5mW Laser products promoted for pointing and demonstration purposes are limited to hazard Class IIIa by FDA regulation Re FS 8 BluRayPointersPending funding only the 65mW Newwish style pointer is left Jul 22 2008 on a average green laser pointer how big should the dot be at roughly 30ft? I say green because it seems red laserpointersseems to stay a small dot while at the same distance green lasers are much bigger

the red lasers dot is about the size a BB at ~30 ft while every green laser I tested are Mar 30 2008 Re Welding goggles laser goggles polaroid sungl Welding goggles heavily attenuate the entire visible spectrum with particular emphasis on UV Apr 1 2013 Everyone knows that a couple of layers of developed exposed color print film makes a good Infrared Pass filter that blocks visible light

The question is how good does it block visible light and pass Infrared? The following link > Film makes infrared Mar 20 2012 hello Ive been attempting to source laser modules and diodes lately for the purpose of reselling cheaply

Lately though ive noticed that many high powered laserpointersseem to cost far less than the diode of that power rating and wavelength! whats up with that? ive confirmed with a few Nov 27 2014 I have a cheap 5MW green laser that

When I adjust the lens at the front by screwing it in or out the laser beam diameter becomes smaller or larger

When the beam is spread out I notice that the beam is not uniform it contains round patches and there are radial patterns as well as show in this Snake_X said why doesn t dx mod the laser so that it will have safety features? Because when it s a pen style pointer it s hard and expensive to put those things in

Look at the DX penpointersor the red burner you linked where in that thing are you going to fit a key switch an aperture shutter and a safety dongle? Oct 6 2015 Ah if you are a veteran on this page many remember i purchased a wicked laser i believe was around \$40+ so after so many years i made a decision to replace the diode its very simple nothing to press in just place and screw the head on i also added a tiny bit Thermal Compound see images diode.
