Oct 10 2024 Stool comes in a range of colors. All shades of brown and even green are considered typical. Only rarely does stool color indicate a possibly serious intestinal condition

Stool color is generally influenced by what you eat as well as by the amount of bile a yellow green fluid that digests fats Oct 12 2023 Sometimes you may see undigested food fragments in stool

This usually is high fiber vegetable matter which usually isn't broken down and absorbed in your digestive tract. At times undigested food is a sign of poor chewing and fast eating

Make sure that you chew your food well May 16 2025 A colostomy is an opening in the colon that lets stools pass from the body without going through the anus. During colostomy surgery an opening is made in the belly called a stoma

Part of the colon is brought through that opening and attaches to a pouch outside the body. Stools pass through the Jan 11 2024 Narrow stools that happen now and then probably are harmless

But in some cases narrow stools especially if pencil thin may be a sign that the colon is narrowing or has a blockage. And that could be due to colon cancer

Irritable bowel syndrome IBS also may cause changes in the size of The colon's main job is to process digested food absorb water and form stools which are then removed from the body. When cancer grows in the colon it can block or change the way stool moves through the intestines

Cancer also can cause bleeding or interfere with the absorption of nutrients and water. When this happens you might see changes in how the stool looks or the size or how often Jan 18 2025 Diarrhea loose watery and possibly more frequent passage of stool is a common problem

Sometimes it's the only symptom of a condition. At other times it may be associated with other symptoms such as nausea vomiting abdominal pain or weight loss. Luckily diarrhea is usually short lived lasting no more than a few days

But when diarrhea lasts beyond a few days it is usually a Nov 27 2024 Fecal incontinence is accidental passing of solid or liquid stool. Fecal incontinence may happen when a person has a sudden urge to pass stool and cannot get to a toilet in time

Also stool may leak when a person doesn't sense the need to pass stool. Common causes of fecal incontinence include Dec 7 2023 Blood in your stool on the toilet paper or in the toilet bowl can have various causes
