Thesquare brackets aroundthei inthemethod signature denote thattheparameter is optional not that you should type square brackets at that position Mar 8 2013 git stashpopthrows awaythe topmost by default stash after applying it whereas git stash apply leaves it inthestash list for possible later reuse or you can then git stash drop it

This happens unless there are conflicts after git stashpop in which case it will not removethestash leaving it to behave exactly like git stash apply

Another way to look at it git stashpopis git 2 I could reproduce clean git stashpopon dirty directory with uncommitted changes but not yetpopthat generates a merge conflict

If on merge conflictthestash you tried to apply didn t disappear you can try to examine git show stash {0} optionally with ours or theirs and compare with git statis and git diff HEAD Your other email account needs to havePOPaccess. If youre not sure check your other email accounts settings menu

You cant add an Outlook account to Gmail on your computer. To connect to Outlook Microsoft now requires non Microsoft email users to use modern authentication
