Jan 30 2025 Windows 11 is rejecting the driver signature for the Intel Bluetooth connection

Is there a work around? Does Intel know and is it trying to fix it? From the Intel assistant Driver Details Up to date Provider Intel Corporation Version 23.110.0.4 Date 2024 12 18 From the Device manager Windows Aug 24 2025 Intel Wireless Bluetooth Drivers for Windows 10 and Windows 11\* For PCs with Intel Wireless AC 9560 Intel Wireless AC 9462 Intel Wireless AC 9461 Before Upgrading from 23.10.x.x 23.50.x.x versions to this 23.160.0 driver the user needs to disconnect all the Bluetooth devices and unpair all the previously paired devices in Mar 27 2025 Expand the Bluetooth category

Right click your Intel Wireless Bluetooth and choose to uninstall it. Make sure to the option to Delete the driver software for this device is selected. Repeat steps A through D until the the option to Delete the driver software for this device is greyed out. Step 2

Restart your computer. Step 3 Driver installation Dec 18 2023 Hi Albert and thank you for your response. I use the Intel Driver Support Assistant to update all my Intel drivers

Is this a new computer? No it was built in 2020 Did you make any recent hardware software changes besides the Bluetooth driver update that might cause this problem? The only hardware modification is the installation of an Intel Ethernet controller X450 AT2 The wireless card Mar 4 2025 From the Device Manager applet check the Network Adapters section for an entry for Intel Wi Fi 6 AX201 and check the Bluetooth section for an entry for Intel Wireless Bluetooth that has an Intel driver associated with it

If neither is the case skip forward to Step 12

Right click on the entry for Intel Wi Fi 6 AX201 and select Uninstall Device Oct 26 2024 From the Device Manager applet check the Network Adapters section for an entry for Intel Wi Fi 6 AX201 and check the Bluetooth section for an entry for Intel Wireless Bluetooth that has an Intel driver associated with it

If neither is the case skip forward to Step 12. Right click on the entry for Intel Wi Fi 6 AX201 and select Uninstall Device Jun 27 2025 My wifi driver Intel R Wi Fi 6 AX201 160 MHz has completely ceased to function

I ve tried running the Driver Assistant tool multiple times and installing the newest version of the driver has not helped at all. I m not very technologically inclined and I m having a really hard time understanding what to fix here

Some relevant info I have a Lenovo Yoga laptop running on Windows 11 Jan 8 2023
