Nov 21 2021. Student class Student { private string lessons[2] = {string Feb 3 2012 Visual Studio allows unit testing ofprivatemethods via an automatically generated accessor class. I have written a test of aprivatemethod that compiles successfully but it fails at runtime

A Apr 14 2023 The first query gets all publiclessonsregardless of the author the second query only gets theprivate lessonsthat the user created. I would then like to combine those results or create a union of the results

I m relatively new to flutter firestore I ve looked for some solutions online but I couldn t find one that fits my specific scenario Jul 14 2015 I have written a code to record audio and save it to below file location.privateString getFilename { String filepath = Environment.getExternalStorageDirectory .getPath File file = I have a ListprivateList<Lesson>lessons and I need to save this list to PostgreSQL database column with data type _json or json[] JSON array

But I get one of these errors Jan 5 2024 For example Home > Library >Lessons> Lesson Name AssignedLessons> Lesson Name When the route of the course names is the same how should I child them or is there a way to do it without following the route? I tried to do it according to the route the result I expected was Home > Library >Lessons> Lesson Name AssignedLessons> Lesson Name Aug 17 2017 } MenuFlyoutItem.Click privatevoid Edit object sender RoutedEventArgs e { Frame.Navigate typeof ElementInfo e.OriginalSource as MenuFlyoutItem .DataContext } I get null in DataContext

How to get ListViewItem that have called this MenuFlyout or Content of this ListViewItem? Mar 2 2018 public ICollection<UserCourse> UserCourses { get private set } public static Course Create string name int year int semester List<Lesson>lessons List<User> professors Nov 6 2023 Based on Dynamically create a new protobuf message I have this Python code which dynamically generates a protobuf containing two ints and a string

Context a dynamic data server will transfer q Jan 13 2025 I am trying to use spring boot starter oauth2 client with the new Spring Framework release 6 HttpInterface Configuration public class RestClientConfig { Bean public RestClient restClient.
