With our Android iPhone iPad and Desktop Browser clients you can receive unlimited push notifications on all of your devices from dozens of websites services and applications that already integrate with Pushover. Our Android device client uses Google's secure push notification service for instant delivery of Pushover messages without a dedicated polling service to waste battery power or bandwidth. Signup for a Pushover Account New to Pushover? Download Pushover for Android or iOS and signup right from the app or create a new account through our website. Here are some applications plugins and websites created by us and our users that you can use with your Pushover service.

Please note that any unofficial applications listed here have not been written by us and we cannot vouch for their privacy security or availability. Multiple devices of the same platform are covered under the same one time purchase so you can use Pushover on your iPhone and iPad or an Android phone and Android tablet without paying anything extra.

There are no subscription fees for individuals using Pushover. Pushover uses a simple versioned REST API to receive messages and broadcast them to devices running our device clients.

To simplify the user registration process and usage of our API there are no complicated out of band authentication mechanisms or per call signing libraries required such as OAuth. To quickly get started sending Pushover messages with a wide variety of programming languages we have some sample code as well as a number of 3rd party libraries written and maintained by Pushover users. Pushover for Desktop is free to try for 30 days after which a one time license must be purchased for \$4.99 USD with no monthly fees.

You'll be able to register as many browsers as you use 1 at no additional cost just like our Android and iOS apps. What is Pushover and how do I use it? In short Pushover is a service to receive instant push notifications on your phone or tablet from a variety of sources.

To quickly get started Install our client app on your iPhone iPad or Android device or register your Desktop browser. General Questions 8 What is Pushover and how do I use it? How much does Pushover cost? Is there a subscription? How do I send messages to other users with Pushover? Does Pushover use SMS Text Messages? How can I delete all messages from an application or all messages globally? Can I view my notifications from multiple devices?.
