Population density people per km<sup>2</sup> by country The following is a list of countries and dependencies ranked by population density sorted by inhabitants per square kilometre or square mile

The list includes sovereign states and self governing dependent territories based upon the ISO standard ISO 3166-1. Population density is a measure of the number of people living per square kilometer of land area.

It gives a clearer picture of how crowded or spacious a country or region is. Population density can have significant implications on resources, infrastructure and the environment.

In densely populated countries there is often more demand for housing, transportation, healthcare and other. The United States of America has a population density of 38 km<sup>2</sup> which is quite low considering the U.S. is also the country with the third highest population in the world.

For comparison the two countries with the highest populations, China and India, have population densities of 151 km<sup>2</sup> and 488 km<sup>2</sup> respectively. This list provides the population densities for all the countries of the world and for all but the smallest political dependencies and territories.

The places are ranked from most to least crowded. The population density of 3rd ranked Singapore is the highest among countries/territories with over one million people. Hong Kong and Gibraltar complete the list of the top five most densely populated countries/territories.

Among the top 10, six are located in Asia and three are located in Europe. Oct 22, 2025. The world's average population density is 141.6 people per square mile, calculated as the total population divided by the sum of the land area of 197 countries. Compare population density across all 193 UN member countries.

Discover the highest, lowest and global average figures in an interactive table. Population density is midyear population divided by land area in square kilometers. Population is based on the de facto definition of population which counts all residents regardless of legal status or citizenship, except for refugees not permanently settled in the country of asylum, who are generally considered part of the population of their country of origin.

Land area is a country's total.
