Dec 10 2025 Pi in mathematics is the ratio of the circumference of a circle to its diameter

Because pi is irrational not equal to the ratio of any two whole numbers its digits do not repeat and an approximation such as 3.14 or 22/7 is often used for everyday calculations The number pi spelled out as pi is a mathematical constant approximately equal to 3.14159 that is the ratio of a circle's circumference to its diameter Draw a circle with a diameter all the way across the circle of 1

Then the circumference all the way around the circle is 3.14159265 a number known as Pi. Pi pronounced like pie is often written using the greek symbol

The definition of pi of a Circle Pi often represented by the lower case Greek letter one of the most well known mathematical constants is the ratio of a circle's circumference to its diameter May 17 1999 Succinctly pi which is written as the Greek letter for p or is the ratio of the circumference of any circle to the diameter of that circle Pi is an irrational number which means you can't write it as a simple fraction

Its decimal form goes on forever and never settles into a repeating pattern. No matter how far you go the digits keep coming. We use the Greek letter to represent it  $\pi$  is the ratio between a circle's circumference and diameter

That is  $\pi = \frac{\text{circumference}}{\text{diameter}}$   $\pi$  is a fundamental constant in mathematics especially in geometry trigonometry and calculus Pi is a name given to the ratio of the circumference of a circle to the diameter

That means for any circle you can divide the circumference the distance around the circle by the diameter and always get exactly the same number Pi is a constant value. That is the ratio of the circumference to the diameter is the same for all circles

The drawing below shows the circumference of a circle that has been straightened out. It is a little more than three diameters in length Pi is an irrational number Pi is one of the most famous constants in mathematics representing the ratio of a circle's circumference to its diameter

As early as 2000 BCE ancient Egyptian and Babylonian mathematicians began approximating Pi The Internet privacy company that empowers you to seamlessly take control of your personal information online without any tradeoffs Jul 22 2025 TheDuckDuckGoBrowser Fresh New Look Same Great Protections AI Optional Filed under DuckDuckGoNews on 22 Jul 2025 Have you been using theDuckDuckGobrowser for a while?
