Radium isn't fissile or at least most isotopes of radium aren't fissile

The very basic way that a nuclear reactor works is this a fissile isotope like uranium 235 plutonium 239 or uranium 233 absorbs a neutron and has a chance of undergoing fission if it does undergo fission it releases a lot of energy and between 2.3 new neutrons which can cause more fissions

Many isotopes are Radium was less performant and I suffered a lot of crashes with radium in the callstack and noticed quite a few broken mods. The most apparent was the YUNG's better ender island. Which radium somehow caused the ender dragon to instantly die and broke the fight

Also Radium hasn't been updated since October 2023 as of writing this Aug 31 2023 hi I'm trying to upload a modpack in CurseForge but it's repeating the same error Exception of type `Curse.Radium.InstallManagement.InstallTaskFailedException` was thrown

can anyone help me? Mar 17 2022 The deteriorating radium lume is essentially a loose radioactive dust emitter and is illegal to ship even under this threshold

Around half of the packages I've received containing radium are over this legal threshold and so were sent illegally at a danger to everyone who came in contact with the box Feb 25 2024 I just wanted to create a new mod folder with curseforge with the 1.20.1 version

Exception of type `Curse.Radium.InstallManagement.InstallTaskFailedException` was thrown What does radium taste like? It's a funny question but I already know that uranium tastes like metal but radium? Radium vs Uranium? So if radium is a million times more radioactive than uranium what makes the fiesta ware so much higher? Is it the glass front on the clock stopping the radiation? Aug 20 2023 Hey I am planning to start a modded forge world soon and was wondering if my current performance mods list is acceptable Radium reforged Rubidium Nov 13 2023 The subreddit for all things related to Modded Minecraft for Minecraft Java Edition This subreddit was originally created for discussion around the FTB launcher and its modpacks but has since grown to encompass all aspects of modding the Java edition of Minecraft

The r/feedthebeast subreddit is not affiliated or associated with the Feed the Beast company Apr 27 2023 Radium and tritium don't naturally fluoresce however their decay can excite fluorescent materials which is why you see them used in things like gun night sights and watch hands etc

The deadly element Radon can glow in different colors based on temperature. It can glow a pretty yellow when cooled and the colder it gets the redder it gets.
