Understanding REACH REACH is a regulation of the European Union adopted to improve the protection of human health and the environment from the risks that can be posed by chemicals while enhancing the competitiveness of the EU chemicals industry. The REACH Regulation initially made no specific provision for nanomaterials.

In 2018 the Commission adopted Commission Regulation EU 2018/1881 to modify REACH technical Annexes I, III and VI, XII, introducing nano specific clarifications and provisions. This is a unique source of information on the chemicals manufactured and imported in Europe.

It covers their hazardous properties classification and labelling and information on how to use them safely. About us, Legislation, Business opportunities, Jobs, News, subscription, Consultations, Search for chemicals, Candidate list, C, L inventory, Substances restricted under REACH, Authorisation list, Information on biocides, Support, ECHA CHEM Guidance documents, SMEs, Questions and answers, Dossier submission tools, Contact, Legal notice, Cookies, Site map, Guidance on requirements for substances in articles. This document assists producers and importers of articles in identifying whether they have obligations under REACH in particular in relation to registration and notification according to Article 7 and in relation to article supply chain communication according to Article 33. Chemical substances that are already regulated by other legislations such as medicines or radioactive substances are partially or completely exempted from REACH requirements.

Registration is based on the one substance one registration principle. REACH IT is now issuing list numbers in the new format.

Example of the new format: A00 000 0. Note that the change may affect your company's recording systems outside REACH IT. Substance identification is a process by which the identity of the substance is established.

Accurate identification of a substance is a pre-requisite to most REACH CLP and biocides processes. In particular, it enables joint REACH registrations to be prepared efficiently and correctly and ensures that test data is appropriate for the substance registered under REACH.

This leads to a robust REACH IT system that supports Industry, Member State competent authorities and the European Chemicals Agency to securely submit, process and manage data and dossiers.

These three parties each have access to specific functions of REACH IT which they can use to fulfil their requirements under the REACH and CLP regulations. REACH IT also provides a secure communication channel. The table below is the Annex XVII to REACH and includes all the restrictions adopted in the framework of REACH and the
