Oct 6 2024 Question Hi everyone! Were a university team just getting started with building model rockets and one of our main goals is to develop an active control system

Were currently debating between using movable fins canards or thrust vector control TVC Oct 4 2023 Hello Rocketry Enthusiasts! I hope this post finds you all soaring high in your rocketry adventures! I m a high school student currently navigating through the fascinating world of water rocketry for my research paper

My focus is on the optimization of waterrocketfins in terms of their size Nov 22 2025 I ordered from Chris early this week in the evening. I got an order notification almost instantly. That didn t surprise me. The next day I got a notification that the order was packed and ready to ship

I had selected FedEx ground. Even with Thanksgiving I got the order Friday. It was well Dec 9 2025 Also an ARCrocketshould not require a tracker at all

Between the low altitudes and the required quick total flight times I would certainly focus on getting a solidrocketdesign and potentially logging data before even considering a tracker If you have a personal rocketry related item for sale or that you re looking for this is where you list it

These are for one time sales items no business sales. To post you must either be a member for 30 days AND have 20 posts OR be a Supporting Member Apr 4 2023 I have a tall thinrocketwith a fineness aka aspect ratio or length to diameter ratio of ~26 80 long 3.1 diameter

As currently configured it has a stability margin of 3.7 14.6% in OpenRocket. I am trying to answer the age old question is if thisrocketis over stable

The only rule of Nov 15 2024 Aftershock II has officially become the highest and fastest amateurrocketof all time! Following its successful launch and recovery on October 20 2024 data from the on board avionics unit was collected and analyzed to reconstruct therockets flight path

After a thorough internal review the Jan 18 2024 I m terrified of losing myrocketthough and am contemplating investing in some sort of tracking system. I know these egg timers are suggested but yes I m intimidated by all the tiny parts

I m wondering if there s anything that works with iPhone perhaps? Something simple and cheaper than the \$500 kits I see on some websites? May 29 2023 Hello everyone I am currently in the process of building a HPR hybridrocketmotor and am posting to get opinions advice and help
