Jan 5 2012 308 Assume that we are playing a game of Russian roulette 6 chambers and that there is no shuffling after the shot is fired

I was wondering if you have an advantage in going first? If so how big of an advantage? I was just debating this with friends and I wouldn't know what probability to use to prove it Mar 24 2017 In a game of Russian Roulette there are 6 chambers one of which has a bullet in it

You are playing with one other person. You go first. Now your chance of getting hit is $\frac{1}{6}$. After firing an Two men plays Russian roulette

In revolver there are 2 bullets in consecutive chambers 2 bullets are in 2 chambers next to each other. One man spun the cylinder pulled the trigger and he is fi Aug 15 2017 Typical Russian Roulette question but I can't get my head around it 1 person has a gun with 1 bullet 6 chambers

He spins the chambers before every attempt. What are the odds that he WON'T su Aug 4 2024 There I had a question on Russian Roulette Series You are playing a game of Russian Roulette. If instead of one bullet two bullets are randomly put in two consecutive positions in the chamber

Your opponent played the first and he was alive after the first trigger pull. You don't spin the barrel. What is the probability that you loose in Apr 18 2020 A single bullet is randomly put into a 6 chamber revolver

2 players A and B take turns pulling the trigger with the barrel pointed at themselves. Each time the trigger is pulled the barrel rotate May 26 2020 We are to play a version of Russian Roulette the revolver is a standard six shooter but I will put one bullet in the gun

I spin the chambers put the gun to my head pull the trigger and survive Aug 12 2025 Russian Roulette consecutive bullets In a Russian roulette what if two bullets are randomly put in two consecutive positions and How to calculate the probability of survival in the following Russian Roulette all suppose that the cylinder is not spun between the time when the first player pulls the trigger and the time when the second player Aug 23 2022 In an imaginary Russian Roulette game there's the standard 6 holes and single bullet in the gun but once the trigger is pressed the cylinder's spin is random

Both the direction and amount of holes it will move are random. Some people where adamant in claiming you can press that trigger a billion times and not get shot Sep 24 2023 Say we are playing Russian roulette with a pistol with \$6\$ slots \$1\$ with a bullet

Then what's the probability that you'll survive if you've shot the gun \$n\$ times
