A sapphire is a precious gemstone belonging to the corundum mineral family known for its incredible durability, brilliance and vibrant colors. Sapphire is a tough and durable gem and the only natural gemstone harder than diamond.

Despite this, sapphire is still subject to chipping and fracture if handled roughly and care should be taken to ensure it is properly handled. As a sibling to the ruby, the sapphire shares its value, appeal and scarcity.

They are both members of the corundum family, with rubies being red and sapphires covering all the other colors. Sapphires are famously blue but yellow, green or purple versions are objects of true wonder. In folklore, history, art and consumer awareness, sapphire has always been associated with the color blue.

Its name comes from the Greek word sappheiros, which probably referred to lapis lazuli. Earn rewards on travel and dining with Chase Sapphire credit cards offering points and travel credits. Apply now to enjoy exclusive benefits.
