How do I copy a folder from remote to local host usingscp? I use ssh to log in to my server. Then I would like to copy the remote folder foo to local home user Desktop. How do I achieve this? Mar 5 2015 In my terminal shell I ssh ed into a remote server and I cd to the directory I want

Now in this directory there is a file called table that I want to copy to my local machine home me Desktop user88595 Over a year ago Only solution which allows the use ofscp 3 from and to servers with ssh listeners on different ports.scp 3 P 123 server1 file P 456 server2 file or similar alternatives wouldn t work scpassumed the same port across both servers Sadat Over a year ago Best solution ever where the source file is from Remote machine Jun 19 2015 I have some n number of files in a directory on my unix system

Is there a way to write a shellscript that will transfer all those files viascpto a specified remote system

I ll specify the passw Using the stock scp from a recent Windows Server 2022 version I was able to use the command from this answer above but with using a colon in the drive specifier as the first path segment on the target Windows machine scpsome_file user host C TEMP I want to be able to transfer a directory and all its files from my local machine to my remote one

I dont useSCPmuch so I am a bit confused. I am connected to my remote machine via ssh and I ty Sep 30 2015 Note thatscpfollows symbolic links encountered in the tree traversal

So if you have sub directories inside local_dir the last example will only transfer files but if you set the r option it will transfer files and directories I have created a file on a remote computer that I have ssh ed into. I want to transfer the file back to the laptop I am using at the moment

I see that I am supposed to use the command scpusername scpuses ssh for data transfer with the same authentication and provides the same security as ssh

A best practise here is to implement SSH KEYS AND PUBLIC KEY AUTHENTICATION 19 You could use something like the followingscp r linux_username linux_address path to file path to local directory This will copy file to the specified local directory on the system you are currently working on

The r flag tellsscpto recursively copy if the remote file is a directory.
