Mar 14 2024 TRONLink is a dedicated wallet built for TRON and allows support for energy bandwidth functions that can reduce overall transaction fees and allow you to vote in governance on the TRON Blockchain Nov 24 2019 Tronlink Wallet Just a couple more newbie questions. Bear with me

I added the Chrome extension created a password wrote down the 12 words set up the wallet. Transferred some TRX into it froze voted. So far so good. What worries is all it takes is the password to get into the wallet

With Binance and Coinbase they have the 2 Factor Mar 6 2023 TronLink Wallet Hey TRON family Im moving my TRON and BTT tokens from an exchangeWhats your opinion on the TronLink Wallet? IOS device Jun 22 2021 Was the Tronlink wallet your main wallet? I use tronlink pro but its just a go between for my hardware wallet Dec 16 2023 Yeah TronLink is great for TRC20 very low cost

Also CryptoStake trx wallet app seems legit and secure IMO but as always take precaution online I have been using both since last year and they were giving very good experience to store my money Nov 27 2021 To activate my account TRONLink says that we have to get some TRX transferred from another wallet to this one

But how am I supposed to do that if this is my first account?? Please let me know how I should go about this

For reference my wallet is TT5uMYqX62XgfR66hoMJH2e8xpBWo5xn6C First time in the trc20 network I usually work with ERC20 Mar 20 2023 Help Accessing Old TronLink Wallet I created a TronLink wallet 2 or 3 years ago and I do have the username and password I created to access that wallet

I accessed the wallet through the TronLink chrome extension. I haven't used the wallet for a year or two and now when I try to use the extension to login it doesn't give the password login Jun 3 2021 Tronlink is a trusted wallet you can definitely use that too

A good thing about tronlink is it injects the tronWeb.js into the page so you can create apps that use tronWeb and use the wallet to sign instead of asking for their private key you can use swap feature on tronlink to get LTC BTC USDT or anything else that coinbase deals with then transfer to coinbase and cash in

Or you can transfer to Klever wallet and swap there also Oct 26 2022 You can avoid burning the TRX in your wallet if you stake enough TRX for energy and bandwidth for your daily usage. You get 1500 free bandwidth everyday even without staking. Please use TronLink wallet it's the best for Tron

Although I am not sure about one more bit of info is about using the PSM burning
