Nov 29 2022 Why is a blood urea nitrogen test done? A healthcare provider may recommend a BUN test during a checkup as part of a comprehensive metabolic panel (CMP) or basic metabolic panel (BMP) blood test. Nov 22 2025 Why You Get the Blood Urea Nitrogen Test Your doctor may order a BUN test as part of a routine checkup when a comprehensive metabolic panel (CMP) or basic metabolic panel (BMP) blood test is taken. Aug 5 2023 A common blood test the blood urea nitrogen (BUN) test reveals important information about how well your kidneys are working.

A BUN test measures the amount of urea nitrogen that's in your blood. Here's how your body typically forms and gets rid of urea nitrogen. Your liver produces ammonia. What is it used for? A BUN test is often part of a series of tests called a comprehensive metabolic panel (CMP).

It can help diagnose or monitor kidney diseases. Oct 6 2025 Blood urea nitrogen (BUN) testing is commonly part of the basic metabolic panel (BMP) or comprehensive metabolic panel (CMP) which is commonly obtained as part of a routine medical examination.

It is also obtained in patients in emergency or urgent care settings as it can provide valuable information that may provide clues to various clinical conditions. Aug 21 2025 Blood urea nitrogen (BUN) is a product of protein metabolism that gets excreted in the urine. BUN levels are often tested as a measure of kidney function and can help to determine the cause of renal failure when used to obtain the BUN to creatinine ratio. Oct 9 2025 What is BUN? Your blood urea nitrogen (BUN) level is based on a blood test that measures the amount of urea nitrogen in your blood.

Urea nitrogen is a waste product that your body makes after it breaks down protein. Healthy kidneys take urea nitrogen out of your blood.

When your kidneys are not working well, your BUN level goes up. Aug 3 2025 BUN testing is typically performed as part of a comprehensive metabolic panel (CMP) or basic metabolic panel (BMP).

The test requires a simple blood draw and while fasting isn't always necessary, your healthcare provider may recommend it for the most accurate results, especially if other tests are being performed simultaneously.
