7 The AppData\Local and AppData\Roaming locations are the preferred locations for applications to store data that is not required to be exposed to the user.

In a domain environment the Roaming is used to copy the user's environment as they log on to different computers

You can find a description in the Windows File System Namespace Usage Jan 20 2025 The temp folder is not always deleted even after proper shutdowns and the space can pile up to large proportions. You don't need to delete the folder itself though only its content

You can safely select everything and shift delete the files to permanently delete the files. It will fail deleting everything and will complain that some files are in use

Just say Ignore for all occurrences Jun 7 2021 I also tried defining my own user variable in Edit environment variables for your account and defined  
LOCALLOWAPPDATA C:\Users\<your user profile>\AppData\LocalLow The original User's Profile directory lives in a directory like C:\Users\username\AppData

How can I refer to the current user's profile directory when using the Windows command line? Sep 14 2017 Navigate to c:\Users\username\appdata execute the following command mklink d local d:\appdata\local replace d:\appdata\local with the actual path of where you moved the appdata to

If you cannot move or delete the original copy create a 2nd user make it administrator login with it and retry the option. This should ensure that no files are in Jun 12 2023 The folder under User\AppData\Roaming does exist and I can access it manually through Windows Explorer

However the Win + R method I described earlier doesn't work Jul 13 2019 The AppData folder is located in a user's folder eg C:\Users\Username\AppData whereas the program files folder is located in C:\ The biggest difference here is permissions

If you have just one user on your pc then that user has all rights everywhere and it may not make sense. But if you have multiple users then it starts to make sense User profiles are stored in User Data Directory and it varies depending on the operating system

The easiest way is to navigate to chrome version and look for the Profile Path field

Example Windows [Profile Path] C:\Users\Alice\AppData\Local\Google\Chrome\User Data\Default [User Data Dir] C:\Users\Alice\AppData\Local\Google\Chrome\User Data 0 %localAppdata% Opens AppData's Local folder C
