What does \$ mean in shell? I have code such as if [ \$ eq 0 ] then I want to understand what \$ means but Google search is very bad for searching these kinds of things Shell equality operators = == eq Asked 12 years ago Modified 3 years 7 months ago Viewed 650k times Shell Shell is a program which facilitates the interaction between the user and the operating system kernel

There are many shell implementations available like sh Bash Cshell Zshell etc Feb 20 2011 When going through oneshellscrip I saw the term \$?

What is the significance of this term? Oct 27 2021 The shell will try to create directory test and then only if it was successful will try create file inside it

So you may interrupt a sequence of steps if one of them failed May 8 2012 I understand the basic difference between an interactive shell and a non interactive shell

But what exactly differentiates a login shell from a non login shell? Can you give examples for uses of I often come across \$? \$0 \$1 \$2 etc in shell scripting

I know that \$? returns the exit status of the last command echo quot this will return 0 quot echo \$? But what do the others do? What Sep 14 2012 \$! is the PID of the most recent background command. \$0 is the name of the shell or shellscript

Most of the above can be found under Special Parameters in the Bash Reference Manual. Here are all the environment variables set by the shell

For a comprehensive index please see the Reference Manual Variable Index Nov 15 2010 A bashism is a shell feature which is only supported in bash and certain other more advanced shells

It will not work under busybox sh or dash which is bin sh on a lot of distros or certain other shells like the bin sh provided on FreeBSD Oct 19 2022 How do I read user input into a variable in Bash? fullname= quot quot Now read user input into the variable 'fullname'.
