Oct 15 2025 There are many types of shock: sepsis, anaphylaxis, hypovolemic, cardiogenic, and others. This article describes symptoms and treatment of each type.

Jul 15 2024 Shock is a life threatening condition with symptoms like low blood pressure, weakness, chest pain, etc.

Learn about causes, types, and treatments.

Nov 2 2023 Lack of blood flow means the cells and organs do not get enough oxygen and nutrients to function properly. Many organs can be damaged as a result. Shock requires immediate treatment and can get worse very rapidly.

As many as 1 in 5 people in shock will die from it. Shock is a life threatening manifestation of circulatory failure.

Circulatory shock leads to cellular and tissue hypoxia, resulting in cellular death and dysfunction of vital organs.

Jun 28 2025 Shock: All types of shock - septic, hypovolaemic, cardiogenic, and anaphylactic.

Learn causes, symptoms, clinical features, and emergency treatment.

Shock makes your organ systems shut down due to a lack of blood flow and oxygen.

The goal of shock first aid is to stabilize a person as much as possible and buy time until they can get professional medical care.

Dec 22 2025 Shock is usually caused by hemorrhage or overwhelming infection and is characterized in most cases by a weak, rapid pulse, low blood pressure, and cold, sweaty skin.

Depending on the cause, however, some or all of these symptoms may be missing in individual cases. A brief treatment of shock follows.

Jul 27 2018 Shock can lead to multiple organ failure as well as life threatening complications. There are many types of shock.

They fall under four main categories based on what has affected the flow of blood:

Common causes of shock include severe bleeding and severe allergic reactions, anaphylaxis, but shock can develop quickly after any serious injury or illness.

A person who is showing signs and symptoms of shock needs immediate medical attention.

Jun 1 2025 Shock causes, symptoms, and treatments. Learn about its types like cardiogenic, hypovolemic, distributive, and obstructive. How to manage them effectively.
