d OverviewASTMA192 ASME SA192 is a standard specification recognized by both the American Society for Testing and Materials ASTM and the American Society of Mechanical Engineers ASME covering minimum wall thickness seamless carbon steelboilerand superheatertubesfor high pressu ASTMA192seamless carbon steelpipesare mainly used inboilerand superheater systems which must withstand high pressure and high temperature

Tubing having other dimensions may be furnished provided suchtubescomply with all other requirements of this specification May 21 2025 This article will deeply analyze the specifications dimensions tolerances chemical composition mechanical properties and applicable fields ofASTMA192to help buyers and engineers have a more comprehensive understanding of this key industrial pipe standard This guide covers standard specifications for minimum wall thickness seamless carbon steelboilerand superheatertubesfor high pressure service

The steel shall conform to the required chemical composition for carbon manganese phosphorus sulfur and silicon Nov 19 2025 In the field of high temperature and high pressure equipment ASTMA192 ASME SA192 seamless carbon steelboilertubesfor high pressure applications have become the material of choice for critical components due to their exceptional performance A192tubingrefers to seamless carbon steel tubing used primarily in high temperature applications such as power generation and petrochemical industries

It is known for its strength durability and resistance to pressure making it suitable for heat exchangers andboilerapplications Aug 7 2020 ASTMA192 identical with ASME SA 192 is the standard specification covering minimum wall thickness seamless carbon steelboilerand superheatertubesfor high pressure service.
