To open Gmail you can sign in from a computer or add your account to the Gmail app on your phone or tablet. Once you're signed in, open your inbox to check your mail. What happens when you use Sign in with Google? Sign in with Google uses a securely transmitted code based on your Google Account.

It allows apps and services to authenticate you and create an account based on the info it shares from your Google Account like name, email, and profile picture. Learn how Sign in with Google helps you share data safely.

You can review or remove connections that use it. If you already have a Google Account and deleted your Gmail account, you can add Gmail to your current Google Account. Follow the onscreen information to add Gmail to your account.

When you add Gmail, your Gmail address will become the primary username on your account. It will be what others see when you share information such as documents or photos from your Google Account.

Your original Important Before you set up a new Gmail account, make sure to sign out of your current Gmail account. Learn how to sign out of Gmail. From your device, go to the Google Accounts sign in page. Click Create account.

In the drop-down, select if the account is for your Personal use, Child, Work, or business. To set up your account, follow the steps on the screen. Use your Google Account to quickly and securely create new accounts or sign in to your favorite apps and sites without the need for usernames and passwords. You can customize your browsing experience when you sign in to Chrome through your Google Account. Important When you create a Google Account for your business, you can turn business personalization on.

A business account also makes it easier to set up Google Business Profile, which helps improve your business visibility and manage your online information. When you create a Google Account, we ask for some personal info.

By providing accurate info, you can help keep your account secure. And if you sign in temporarily on a computer, phone, or tablet that doesn't belong to you, use a private browsing window.

For example, a public computer that's available to lots of people like at a library. From here, you sign in to your Admin console and other programs or services your company has set up with SSO at the same time.

Just enter the sign-in name and password your admin gave you. Sign out of someone else's device. Important If your password is saved to someone else's device, change your password and make sure you're signed out of their device.
