Attack Surface Reduction ASR is comprised of a number of rules each of which target specific behaviors that are typically used by malware and malicious apps to infect machines such as Nov 9 2022 Unfortunately we can only query the Azure AD Device ID and not the Object ID that we need to add the devices to groups so we will need to use PowerShell modules or the Graph API to look up the Object ID for a given Device ID Oct 4 2024 In this article I want to break down the Defender Attack Surface Rules ASRRules and show you what components each rule takes care of and overall how they can minimize the attack surface Microsoft Defenders Attack Surface Reduction ASR rules are critical for blocking malicious activities but misconfigurations can leave gaps

Roy KloostersASRRule Inspector PowerShell script validates yourASRRules enforcement status and provides a clear overview Clone the repository to your local machine. Ensure you have the necessary dependencies installed. This project primarily uses Python and PowerShell

Navigate through the codebase and familiarize yourself with the structure and content. The project consists of the following key components Jul 15 2020 You can enableASRRules by configuring them in the Endpoint Security settings or by creating a dedicatedASRpolicy

Explore each rules specific capabilities they can be a game changer Nov 1 2025 If you have an app that simply enumeratesLSASS but has no real impact in functionality there s no need to add it to the exclusion list

By itself this event log entry doesn t necessarily indicate a malicious threat Feb 19 2025 To address this issue and ensure that similar incidents would be visible in the future I created a custom KQL query to monitorASRRule events related to vulnerable signed drivers May 21 2025 With KQL you can This advanced hunting query identifies instances where the Attack Surface Reduction ASR rule was triggered

It searches for executable and script files blocked or audited by DefendersASRRules across devices. Key details returned include Nov 10 2025 For information on using these queries in the Azure portal see Log Analytics tutorial. For the REST API see Query
