Jan 16 2025 my bestsleepaid is probably promethazine ima try 50mg tonight and see if it can knock me i m going to stop twirling at 1pm today if i can t getsleeptonight then i ll abstain until i can practice my daily routine and have a clean environment

i don t want to find out what happens whensleepdeprivation becomes serious Nov 24 2025 Hi everyone Im posting here from a harm reduction angle because Id really like to understand how people who use amphetamine sulfate speed on a daily or near daily basis manage the practical side ofsleep

Im not looking for encouragement to increase use or unsafe combinations just Aug 28 2009 If you cantsleep72 hours after taking your last pill then it probably wasn t mdma I agree

If you can tsleepafter this long then there must have been some potent long lasting stimulant mixed in there I have a friend who got drunk at a party went to bed tosleep and woke up with a man on top of her having sex with her

She pushed him off and got downstairs spent the following days crying and feeling awful Feb 6 2018 Hi folks SWIM did meth ONE TIME about 5 days ago andsleephas been fucked ever since. Before this 7 8 hourssleepno problem. Now waking up 6am every day still tired after only 4 5 hourssleep

Its really disrupted thesleep wake cycle. Its super annoying! SWIM is not very Oct 22 2012 Isleepwith a refrigerator magnet in my pillow every night and I have honestly felt better as a result of this

I have read that it can be helpful for opening the third eye but I also read somewhere that being regularly exposed to a magnetic field directly next to one s head damages brain May 16 2011 Sleepdeprivation psychosis and stimulant psychosis walk hand in hand

If you are going through the former it is likely for the same reasons that caused the latter

It s irrelevant though the treatment is the same getting some fuckingsleep Oct 29 2012 as the title says can cetirizine it s an anti histamine like Benadryl be used as asleepaid? how many mgs should I take? Jun 9 2006 Im sure the adderall doesnt help but they say the 4th night of nosleepis when you can really start hallucinating

Also i believe ive had it happen a couple times because of addies too and i was fine before im just more panicky and anxious now because i cant and havent gottensleep May 25 2009 Has anyone tried diethyl ether as asleepaid? Compared to chloroform ether has fairly low toxicity
