Jan 14 2024 Does anybody know the bioavailability for insufflation of 7 OH? Ive seen a lot of people say theysnortit but Im wondering what its like compared to orally Jul 14 2025 So I ve been snorting 7oh powder 400 600mg a day for almost a yr now this method only appears to work on certain powders specifcally the fluffy ones and noto the crystalline but even some of the fluffy ones don t work I m wondering if it has to do wih Psuedo in the powder? Is Psuedo more Jul 25 2011 I have 50mg of 7hydroxymitragynine dissolved into 8mL of 190 proof alcohol

I evaped some of the alcohol away and am left with about3 mg of powder which I assume is 7hydroxymitragynine. is this safe tosnortsince it is not the plant material? Also How should I dose it if I want to take it Jan 19 2021 I get the fixation tosnortthings

I used tosnortfocalin tablets on a daily basis for years although never did enjoy snorting adderall or dexedrine given the sheer size of the tablets and lack of any gain effect wise from snorting them

Ritalin and focalin however are very noticeably different when snorted however Feb 26 2010 A fair number of drugs such as Cocaine Heroin Buprenorphine sic? as well as other various opiates and other substances are most efficiently or at least significantly efficiently absorbed through insufflation or snorting

DISCLAIMER [While the above mentioned drugs are most Mar 14 2011 I m getting mixed reports. Never tried lyrica before but some people say it hits in 5 minutes wheninsufflated and some people say it s pointless

So what s the difference in bioavailability? Does it really hit in five minutes? How long does it last when snorted vs taken orally? Any difference Oct 13 2006 you cansnortadderall XR just crush up the beads until its a vary fine powder and sniff

you can make a makeshift mortal and pestal using a cereal bowl and a bent spoon just keep your free hand covering the bowl so the beads dont fly away as you crush em

in my experience if the beads are effectivly crushed i found no difference between snorting adderall XR powder and regular adderall Feb 22 2011 You maysnorta 10 mg tablet and only actually introduce 6 mg with the other 4 mg being lost in the nasal canal

Either method of ingesting snorting or oral will hit your bloodstream at relatively the same time with the snorting method you will see a 4 6 min decrease in the time it takes for it to enter the bloodstream Mar 13 2019 Do you want tosnortthe whole line in onesnortwithout having to stop halfway through
