Mar 24 2022 The easiest method is to add a keyboard language. If you go to Settings > Time and language > Language you can add a language. Add English United States International and switch to it

You can now use the right alt now known as alt gr to typespecialkeys such as altgr+w = alt gr + shift + for or you can type o to type and u as or ~n as e as 'e as c as Apr 18 2013 On Word 2007 to 2013 on Windows you can use Ctrl + Alt + V. On Word 2011 for Mac you can use Control + Command + V

Both of these will bring up the PasteSpecial dialog

There s no shortcut directly for Unformatted Text but since you can use arrows to go to Unformatted Text and Enter to confirm this is probably the fastest way without a macro Jul 31 2010 No luck thesespecialkeys on my laptop don t appear to generate scancode or keypress events

got this idea from a StackOverflow answer too bad it didn t work for me Update 4 years later In 2014 that notebook broke and I stopped using it

In addition I don t run Windows on my current notebook May 27 2019 During last years I have found problems due thisspecialcharacters sometimes symbols have to be escaped at scripts. For example symbol at username can produce problems because some interfaces or cli apps expect a domain urls after

From your experience which symbols are recommended in order to use as plain text and avoid escaping? Jul 22 2020 I have a laptop Windows 10 with no numpad so cannot use alt codes to typespecialcharacters. I purchased a bluetooth numpad but it does not seem to work either

How do I make this work? Oct 1 2022 How can I enter special characters like and in macOS? Ask Question Asked 3 years 2 months ago Modified 5 months ago Is there an Excel formula to identifyspecialcharacters in a cell? Ask Question Asked 12 years 2 months ago Modified 8 years 2 months ago How can I escapespecialcharacters in cell formatting in Excel Ask Question Asked 12 years 6 months ago Modified 4 years 5 months ago Jul 17 2021 A program is available for Windows free known as KeyTweak

The description specifically references the ability to disable specific keys on the keyboard. The comments reviews are fairly mixed. It appears half of the reviews suggest it works great and the other half not so great

There s one post that says it won t work with Windows 10 another says it works fine with Windows 10. Another Mar 28 2022 0 Whatspecialcharacters can be used in Excel formulas? Equal Sign = The most commonly used symbol in Excel is the equal = sign
