Apr 1 2025 I have asplashtext appear upon clicking on a sprite. I am wondering how I can hide this text after a set amount of time. Ex. Cursor clicks on sprite splashtext appears wait 3 seconds splashtext hides Oct 26 2020 I have followed the platformer tutorial and I am making my own game

A Can someone help with creating an intro screen with instructions for the game? Is there a tutorial I can follow or how would I go about creating an intro screen with the name of the game plus instructions? B How can I create background music to the game a sound effect when collecting the coins rubbish and a sound Dec 22 2025 I need help with a game im making Dan The Therapist

Does anybody know how to make asplashtext that has two possible options? also heres the game so far if u want to see it but its pretty bare bones because im mainly working on MoonMan Sep 23 2025 Offending code runs though Ive fixed the issue with the extra If block the location variable has been set to null so the scene has been pushed Splashdialogue appears once the Forever loop completes

Then a few seconds later a random bit of code that was in a run after block runs but that isnt important just annoying Mar 22 2021 alright so Im making a cutscene of text no extensions justsplashdialog and then a function so I have an onUpdate function {} and I said this game.onUpdate function { May 12 2019 Update Ive released this extension more information is available at Info Screens extension beta Ive started creating a TypeScript library that can createsplashscreens and options panels

The library is much more memory friendly than thesplashscreens that Ive used in my previously shared games and I will be going back to update those games once Ive finished this library When I open it in an incognito window and add thesplashscreen it works just fine

Can you try editing the project incognito and see if that fixes the problem? Jul 27 2023 Good morning. I was hoping to pick some brains today. This will be my first year teaching with Makecode Arcade

I was wondering if anyone had any tutorials videos on how to use the console log and splash blocks for debugging. Any help is most appreciated Thanks

Kiersten Feb 27 2025 Running this code wouldsplashAre because 1 is the second piece of our array if we wanted tosplashCool we would need to change the 1 to a 2 Another Cool thing about arrays is that ANY data type can be used Including itself! Mar 4 2025 Im making a First Person shooter and I want a type of enemy to shoot projectiles at me what would I do?.
