Astaris a luminous spheroid of plasma held together by self gravity. [1] The neareststar to Earth is the Sun

Many otherstarsare visible to the naked eye at night their immense distances from Earth make them appear as fixed points of light The Support Team Assisted Response STAR Program is an alternative response team that includes behavioral health clinicians and paramedics to engage individuals experiencing mental health distress and substance use disorders Dec 20 2025 A star isany massive self luminous celestial body of gas that shines by radiation derived from its internal energy sources

Of the tens of billions of trillions of stars in the observable universe only a very small percentage are visible to the naked eye May 2 2025 Astar's gas provides its fuel and its mass determines how rapidly it runs through its supply with lower massstarsburning longer dimmer and cooler than very massivestars A star is agiant ball of hot gas that can be compared to a huge engine hydrogen is its primary fuel

Atoms in the core of stars join together in a physical reaction known as nuclear fusion releasing large amounts of light and heat energy Oct 22 2025 Yellow DwarfStars Our sun is a yellow dwarfstar with a temperature of about 5 500 degrees Celsius

Thesestarsare medium sized and are in the middle of the temperature range A star is ahuge sphere of very hot glowing gas. Stars produce their own light and energy by a process called nuclear fusion. Fusion happens when lighter elements are forced to become heavier elements

When this happens a tremendous amount of energy is created causing the star to heat up and shine. Stars come in a variety of sizes and colors Where DoStarsCome From? Everystarforms in a huge cloud of gas and dust

Over time gravity causes the cloud to contract drawing the gas closer and closer together. As more gas accumulates at the center it becomes denser and pressure increases

This causes it to heat up and begin to glow Apr 11 2025 In a very broad sense astaris simply one of those twinkling points of light you can see in the night sky

But thats not terribly satisfying in either lexicological or physical terms Definition ofstarnoun in Oxford Advanced Learner s Dictionary. Meaning pronunciation picture example sentences grammar usage notes synonyms and more Astaris a luminous spheroid of plasma held together by self gravity
