Astaris a luminous spheroid of plasma held together by self gravity. [1] The
neareststarto Earth is the Sun

Many otherstarsare visible to the naked eye at night their immense distances
from Earth make them appear as fixed points of light Dec 20 2025 A star is any
massive self luminous celestial body of gas that shines by radiation derived
from its internal energy sources

Of the tens of billions of trillions of stars in the observable universe only a
very small percentage are visible to the naked eye May 2 2025 Astars gas
provides its fuel and its mass determines how rapidly it runs through its supply
with lower massstarsburning longer dimmer and cooler than very massivestars A
star is a giant ball of hot gas that can be compared to a huge engine hydrogen is
its primary fuel

Atoms in the core of stars join together in a physical reaction known as nuclear
fusion releasing large amounts of light and heat energy Oct 22 2025 Yellow
DwarfStars Our sun is a yellow dwarfstar with a temperature of about 5 500
degrees Celsius

Thesestarsare medium sized and are in the middle of the temperature range A star
is a huge sphere of very hot glowing gas. Stars produce their own light and
energy by a process called nuclear fusion. Fusion happens when lighter elements
are forced to become heavier elements

When this happens a tremendous amount of energy is created causing the star to
heat up and shine. Stars come in a variety of sizes and colors Apr 11 2025 In a
very broad sense astaris simply one of those twinkling points of light you can
see in the night sky

But thats not terribly satisfying in either lexicological or physical terms
Where DoStarsCome From? Everystarforms in a huge cloud of gas and dust. Over
time gravity causes the cloud to contract drawing the gas closer and closer
together

As more gas accumulates at the center it becomes denser and pressure increases

This causes it to heat up and begin to glow Explore the mesmerizing world of
stars their life cycle from nebulae to black holes different types like red
giants and white dwarfs Definition ofstarnoun in Oxford Advanced Learner s
Dictionary
