Dec 15 2014 4 System Interruptsalso known as Interupts and IRQsare operating system level processes that manage how hardware communicates with your system

As explained here on Wikipedia In systems programming an interrupt is a signal to the processor emitted by hardware or software indicating an event that needs immediate attention Nov 25 2018 System interrupts appears as a Windows process in your Task Manager but its not really a process

Rather it sums up the CPU usage of all interrupts that happen on a lower system level May 10 2020 The culprit according to resource monitor is System and System interrupts

What I have tried to get rid of the problem BIOS update Install all drivers from Asus Windows update Remove all USB hardware Remove extra hard drives Reinstall Clean Windows 10 Disable Windows Update with Gpedit Nothing seems to work Oct 28 2020 Lately my desktop computer has been getting unusual quot System Interrupts quot intermittently on Windows 10 which slows down my PC a lot

It lasts for a few seconds to half a minute. It happens Oct 15 2016 Now with Windows 10 x64 installed Task Manager constantly shows unusual CPU usage by System and System interrupts. To solve this I already tried the following without success Disabling and uninstalling all non essential drivers

Installing newer drivers than the ones that were automagically installed if available Jul 4 2023 High CPU usage by System and System interrupts caused by ACPI.sys but more specifically this is linked to serial port if I disconnect the device connected to the PC via serial port the problem disappears

Is there something to do on the motherboard ? it is a KTQ87 Flex motherboard with Phoenix BIOS in Windows 10 device manager ? Under Process Explorer I noticed that System and occasionally Interrupts are taking between 5% and 20% CPU constantly for hours on end

This is resulting in weird video playback problems. Feb 23 2016 I have Windows 8.1 Pro N x64 on my Toshiba Satellite L505D S5965 and there is a processes in Task Manager that is eating up my CPU

It s called System Interrupts and it takes up 1% 29% of CPU Power Feb 1 2019 System Interrupts Problem or Symptom? See if anyone has ideas on this My Windows 10 Home 1803 has been experiencing download problems. I pretty much always use Chrome. Sometimes the download will complete without a hitch

Other times the whole system will grind to a halt even task manager is slow to respond Feb 20 2019 Excessive interrupts can be caused by failing hardware. As latency monitor suggest the problem is network related the network interface
