Jan 7 2009 I like young girls. Am I a pedophile? Forum rules

===== The Paraphilias Forum is now closed for new posts. It is against the Forum Rules to discuss paraphilias as the main topic of a post anywhere at PsychForums

===== You are entering a forum that contains discussions of a sexual nature some of which are Jun 25 2021 No according to the research you cannot develop DID or OSDD as late as your teens

The Haunted Self which is pretty much the book on dissociation says the maximum age for DID OSDD to form is 7 or 8 years. By the time you were a teen your personality should have been cohesive and therefore not likely at all to split as much as an OSDD diagnosis would suggest

As for your parents being good Jun 18 2023 Alters can form later in life through splitting during stressful events and yes some alters can lay dormant for years until they become known. When our system first knew we were a system it took quite a while for everyone to finally show up

One of our alters had been dormant since we were six. One of our Littles had been stuck in the same memory until we were able to get to her and help Jul 26 2016 Holy \$ %^ I didn't even know this could be a thing 16 is the age of consent in my country

I certainly wouldn't feel guilty and finding girls that age attractive they mature sooner anyway

How I wish I got action at that age! Being attracted to 15 19 year olds would make you a phobophile anyway Apr 10 2016 Introduction by brokensystem Sun Apr 10 2016 8 56 am Hello! You can call me Em and I am the host of a system containing 8 known alters 3 teens 2 adults 3 littles along with possible others

I'm the one fronting most of the time Jul 14 2019 In my teens I was really really messed up. I was raised by an abusive parent. Part of it was I developed a strong flight response to just hide from dangerous situations

When I was a child I went to live with my other parent and I went from abusive parent to a total hands off parent Dec 11 2014 Be careful out there with placing labels on yourself BPD can't be diagnosed until adulthood because teens and younger children often have quite a few symptoms of BPD or other disorders but the symptoms have disappeared by adulthood as the teen child learns how to manage their emotions as part of the maturation process May 15 2020 It might be an odd talk though We're worried because our 12 year old child is unhappy that his father was whooping him after we found a video of him giving himself a blowjob
