Sep 15 2025 Training vision language models VLMs for complex reasoning remains a challenging task i.a. due to the scarcity of high quality image text reasoning data

Conversely text based reasoning resources are abundant and scalable but it is still an open question how to leveraging them for VLM reasoning

To address this problem we propose VOLD a framework to transfer reasoning capabilities from Jun 24 2025 Explore what 2025 holds for cleanenergyfrom solar and wind growth to storage innovations and grid modernization

Key insights from FFI Solutions Apr 15 2025 The U.S.energysystem underwent major changes in the firstquarterof the 21st century as oil and natural gas production surged renewables were deployed more widely andenergyconsumption patterns changed Jun 8 2025 Investors are betting big on renewable energy which is projected to reach \$2.2 trillion this yearamore than double the investment in fossil fuels

This accounts for more than 40% of the \$3.3 Dec 17 2025 Cleanenergymomentumbuilds as solar and wind outpace global electricity demand growth Solar and wind are now expanding fast enough to meet all new electricity demand a milestone reached in the first three quarters of 2025 Mar 3 2025 Trump s trade and geopolitical plans are adding toenergyprice volatility.Energyinvestment is still rising but growth rates are down

Resolving outstanding administrative and infrastructure issues could allow renewables to boom Explore keyenergymarkettrends expert reports policy updates and data insights shaping U.S

and global power renewables and fuel markets Download ourQ32025 US Renewable Energy Pulse report for detailed analysis of solar battery storage windenergytrends and otherenergysector performance measures Nuclear power rose by nearly 4% while renewables grew at nearly 6% led by the accelerated expansion of solar PV and wind.Energysupply from hydropower increased by 4.4% posting a recovery from the record drop seen in 2023 due to droughts in major hydro markets Nov 26 2025 Key takeaways Independent forecasts suggest oil prices may fall below what companies expect in 2026.Energyinfrastructure across North America is aging and struggling to meet growing demand.Energycompanies are increasingly adopting analytical AI technologies including machine learning Jul 24 2025 LITTLETON Colorado July 24 Reuters Global utilities generated a record amount of clean electricity while cutting output from fossil fuels during the opening half of 2025 thereby maintaining.
