Learn how to fix common OneDrive personal or OneDrive for Business sync problems. Resetting OneDrive can sometimes resolve sync issues and resets all OneDrive settings. OneDrive will perform a full sync after the reset. Important: You won't lose files or data by resetting OneDrive on your computer.

Resetting OneDrive only disconnects all your sync connections including personal and work or school. Sep 30, 2025 Last updated September 30, 2025. If you are experiencing problems accessing OneDrive, you can see the status of Microsoft Office Online Services at the Service Health portal. Close the file "This file is in use" by another application. Ensure the file has Read Write permission. This file can't be synced because OneDrive doesn't have permission to access the file. Move the file out of OneDrive and back in again.

Select a section below to see the resolution steps. 2 days ago Close the Registry Editor and try opening your OneDrive files again. Use Office Online. If you're unable to make changes to the registry or the problem persists, consider using Office Online to access and work with your documents.

Check for OneDrive Updates. Ensure that your OneDrive sync client is up to date. This issue occurs when there's a Group Policy setting on the computer that prevents OneDrive for work or school from starting.

If your company's administrator decides to disable OneDrive's consumer sync app but to enable OneDrive for work or school, see Use Group Policy to control OneDrive sync app settings. Mar 14, 2025 Right-click the OneDrive icon and select "Sync now" or "Resume syncing" if available.

Restart OneDrive. Consider closing OneDrive completely, right-click the icon and select "Exit" and "Restart" (2 days ago). Then remove saved Office OneDrive credentials from Windows Credential Manager, restart, and sign in again. This is a common fix when the app remembers an old or wrong account.

The general sign-in guidance points to credential cleanup and reauthentication when usernames stop working. Reset or reinstall the OneDrive sync app. Run Important Beginning January 1, 2022, we are ending support for selected OneDrive desktop apps running on Windows 7, 8, and 8.1. Learn more.

With OneDrive, you can sync files between your computer and the cloud so you can get to your files from anywhere your computer, your mobile device, and even through the OneDrive website. At OneDrive, Aug 15, 2025. Hi there! Totally get how frustrating it can be when OneDrive doesn't sync properly, especially when you're juggling files between your laptop and PC.

Lets walk through a few easy steps to get things back on track.
