Withoutstrip bananas is present in the dictionary but with an empty string as value. Withstrip this code will throw an exception because it strips the tab of the banana line lstrip rstripand stripremove characters from the left rightandboth ends of a string respectively

By default they remove whitespace characters space tabs linebreaks etc Dec 9 2012 I was told it deletes whitespace but s = ss asdas vsadsafas asfasasgas print s.strip prints out ss asdas vsadsafas asfasasgas shouldn t it be ssasdasvsadsafasasfasasgas? 3 Just to add a few examples to Jim s answer according to .strip docs Return a copy of the string with the leadingandtrailing characters removed

The chars argument is a string specifying the set of characters to be removed

If omitted or None the chars argument defaults to removing whitespace The String.strip String.stripLeading andString.stripTrailing methods trim white space [as determined by Character.isWhiteSpace ] off either the front back or both frontandback of the targeted String Oct 8 2015 3 Pointers stripreturns a new string so you need to assign that to something

better yet just use a list comprehension Iterating over a file object gives you lines not words so instead you can read the whole thing then split on spaces

The with statement saves you from having to call close manually Oct 1 2016 I want to eliminate all the whitespace from a string on both ends andin between words

I have this Python code def my_handle self sentence = hello apple sentence.strip But that Aug 29 2012 list = map str.strip list This will apply the function str.stripto every element in list return a new list andstore the result back in list Feb 19 2012 37 Thestrip method removes whitespace by default so there is no need to call it with parameters like \t or \n

However strings in Python are immutableandcan t be modified i.e. the line.strip call will not change the line object

The result is a new string which is returned by the call Jun 17 2014 But when usingstrip strip unneeded it changed the size from 400+ mb to 55 mb which is still considerable yet allowed the library to be accessed from other shared libraries. In short I d truststrip

Maybe your application cannot be reduced any further without code changes.
