The Subjective Units of Distress Scale SUDS is a short hand means for clients to monitor and report on their level of anxiety or distress. Repeated SUDS ratings allow both the client and therapist to monitor changes over time

This is very useful when for example teaching of an anxiety management strategy or during exposure sessions Constriction or congestion or tensing of body parts indicates a higher SUDS than that reported

In using SUDS in a therapeutic setting the therapist does not necessarily define the scale because one of the benefits of asking a patient or client for a SUDS score is that it is simple Feb 16 2025 SUDS is like an emotional thermometer but instead of measuring temperature it measures the intensity of your anxiety or distress

Its a simple yet powerful tool thats been making waves in the mental health community since its inception Nov 20 2025 The SUDS Rating Scale or Subjective Units of Distress Scale SUDS as it is officially known is used to measure the intensity of distress or nervousness in people with social anxiety

The SUDS is a self assessment tool rated on a scale from 0 to 100 SUDS is particularly valuable in behavioral therapies such as Dialectical Behavior Therapy DBT and exposure therapy

By using the SUDS scale therapists can monitor your progress in managing distressing thoughts or situations Jun 28 2025 Subjective Units of Distress SUDS is a self assessment tool widely used in clinical psychology to quantify the intensity of emotional or physiological discomfort experienced by an individual The Subjective Units of Distress Scale SUDS sometimes referred to as the Subjective Units of Disturbance Scale is a foundational single item measurement instrument utilized extensively by clinicians and healthcare professionals Jan 29 2025 Subjective Units of Distress Are a Staple in Mental Health Treatment but What Are They? The Subjective Units of Distress Scale SUDS is a rating tool used during treatment to measure a patients level of distress or anxiety May 6 2023 Developed by Joseph Wolpe in 1969 SUDS is a self report rating scale that helps individuals subjectively evaluate their emotional or physiological distress on a scale of 0 to 10 with 0 being no distress and 10 being extreme distress What are Subjective Units of Distress? This is a concept that comes up constantly in clinical practice we talk about it daily with almost every patient

Its about how you measure or rate your distress and we do this using something called the Subjective Units of Distress Scale or SUDS. So what are SUDS?.
